版本 Revision	更改章节 Description	编制 Prepared	审核 Reviewed	批准 Approved	生效日期 Effective Date
	全章节	周丹凡	葛强	孙元	2015.1.1

1、目的 Objective

本作业指导书旨在规范模具、检具、工装以及专业设备（以下简称“模具”）的核算方法，确保公司能够及时收回开发制造的模具款项，有效防止资产损失。结合公司实际情况，特制定本指导书。

The instruction is formulated to standardize the accounting methods for molds, inspection tools, tooling and professional equipment (hereinafter referred to as Tooling), ensure that the company can promptly recover the payments for the development and manufacturing of tooling, and effectively prevent asset losses. Based on the actual situation of the company, this instruction manual is hereby formulated.

2、适用范围 Applicable scope

本作业指导书适用股份公司本部及其下属公司。

This instruction is applicable to the headquarters and its subsidiaries.

	编号: NBHX-GZZD-FIC-005-02	版本号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总页数	3/4

3、模具类别定义 Tooling category definition:

模具通常是由公司与客户根据特定车型共同开发, 用于生产该车型的零部件产品。

Tooling are generally developed by both companies and customers based on specific vehicles, used to produce products for specific automotive parts tooling.

客户提供模具的技术要求, 公司联系模具供应商采购、制作模具。公司承担模具在使用过程中发生的任何费用, 如维修、更换等; 模具的使用寿命结束后, 需移交给客户或者根据客户要求进行处理。

The customers provide technical requirements for the tooling, and the company contacts the tooling supplier to purchase and manufacture the tooling. The company shall bear any expenses incurred during the use of the tooling, such as maintenance, replacement, etc. Tooling are handed over to the customers or processed according to customers' requirements after the service life of the tooling ends.

公司模具包括以下三类:

Tooling generally include the following three categories in the company:

3.1 经营性模具: 模具在销售合同(定点信、对账单、邮件等)中单独定价, 并由公司向客户开具模具发票(样件除外), 客户单独支付模具价款。

3.1 Operation tooling: Tooling are priced separately in sales contracts (nomination letter, account statement, emails, etc.), and the company issues a tooling invoice to the customers (excluding prototypes), with the customers paying the tooling price separately.

根据收款模式细分为以下两类:

Operation tooling are further divided into the following two subcategories based on the payment method:

3.1.1 一次性收款模式(客户一次性承担): 公司按照客户要求完成模具开发, 客户验收后, 全额支付模具款项, 公司依照约定使用该模具生产产品销售给客户。

3.1.1 One-time payment method (customers pay at one time); The company completes the tooling development according to the customers' requirements. After the customers' acceptance, the customers pay the full amount for the tooling, and then the company uses the tooling to produce

	编号: NBHX-GZZD-FIC-005-02	版本号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总页数	4/4

products and sell them to the customers according to the agreement.

3.1.2 分期收款模式（客户分期承担）：公司按照客户要求完成模具开发，客户验收后，在约定的期间内分期支付，公司依照约定使用该模具生产产品销售给客户。

3.1.2 Installment payment method (customers pay in installments): The company completes the tooling development according to the customers' requirements. After the customers' acceptance, payments are made in installments over an agreed period, and then the company uses the tooling to produce products and sell them to the customers according to the agreement.

3.2 投资性模具（客户不单独承担模具费用）：无对模具单独定价的销售合同（定点信、对账单、邮件等），模具费包含或者加成在零部件产品售价中，公司不单独开具模具发票给客户，客户不单独支付模具价款，此时模具与通用设备的性质基本相同。

3.2 Investment tooling (customers do not bear tooling costs separately): The Tooling are not priced separately in sales contracts (nomination letter, account statement, emails, etc.). Tooling costs are included in the selling price of products. The company doesn't issue tooling invoice to the customers and customers do not pay tooling costs separately. The nature of investment tooling and general equipment is basically the same.

通常包括以下三类：

Investment tooling are further divided into the following three subcategories:

3.2.1 客户不承担模具款：产品售价中未约定模具补偿款，公司针对产品售价开具产品发票。

3.2.1 **Customers do not bear the tooling cost**: The product price does not include an agreed tooling compensation amount, and the company issues a product invoice based on the product price.

3.2.2 按照产品生命周期分摊（客户按期承担）：客户约定在产品生命周期或者约定的期间内在产品售价中包含或加成模具价格，公司开具产品发票。

3.2.2 **Amortization over product life cycle (customers bear the cost over time)**: The customers agree to include or add the tooling price to the product price over the product life cycle or an agreed period. The company issues a product invoice.

3.2.3 按照产品销售数量分摊（客户按量承担）：客户约定随着零部件产品的销售数量逐步支付模具款，公司开具产品发票。

	编号: NBHX-GZZD-FIC-005-02	版本号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总页数	5/4

3.2.3 **Amortization based on product sales volume (customers bear the cost based on quantity):** The customers agree to gradually pay the tooling cost based on the sales volume of the products, and the company issues a product invoice.

3.3 **混合性模具:** 结合 3.1 和 3.2 两种模式, 客户按约定比例一次性承担, 公司开具模具发票; 剩余部分按照产品销售数量或者生命周期承担, 公司开具产品发票。

3.3 **Mixed Tooling:** Combining the models in 3.1 and 3.2, the customers bear a portion of the cost in a lump sum according to the agreement, and the company issues a mold invoice. The remaining portion is borne based on the sales volume of the product or over its life cycle, and the company issues a product invoice.

4、模具核算流程方式 **Tooling Accounting Process Method**

4.1 模具的业务流程 **Business process of tooling**

4.1.1 项目获取阶段: 公司前端业务团队获取客户项目信息后, 进行可行性分析, 参与客户的投标、报价等, 中标后与客户签订框架协议或意向合同协议等

4.1.1 **Project acquisition stage:** After obtaining customers project information, the front-end business team of the company conducts feasibility analysis, participates in customers bidding, quotation, etc., and signs framework agreements or intention contract agreements with the customers after winning the bid

4.1.2 产品及相应工装模具的设计开发阶段; 公司项目开发团队与客户沟通具体开发标准及图纸、数模等技术参数要求, 并进行产品、工装模具以及生产工艺等的设计、开发

4.1.2 **Design and development stage of products and corresponding tooling;** The company's project development team communicates with customers about specific development standards and technical parameter requirements such as drawings and numerical simulations, and designs and develops products, tooling, and production processes

4.1.3 样件试生产阶段: 完成设计开发工作后, 公司开始进行样件试生产

4.1.3 **Sample trial production stage:** After completing the design and development work, the

	编号: NBHX-GZZD-FIC-005-02	版本号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总页数	6/4
company begins to conduct sample trial production 4.1.4 PPAP (生产件批准程序) 取得客户确认的 PSW (零件提交保证书) 阶段: 试生产完成后进入 PPAP 阶段公司需向客户提交相关 PPAP 审批材料, 客户对公司进行全面评估审核, 并出具 PSW 确认文件 (即对公司产品尺寸、外观、材料、性能以及生产工具、工艺、工程数据等进行验收确认, 批准量产) 4.1.4 PPAP (Production Part Approval Procedure) PSW (Part Submission Guarantee) Stage for Customers Confirmation: After trial production is completed, the company enters the PPAP stage and needs to submit relevant PPAP approval materials to the customers. The customers conduct a comprehensive evaluation and review of the company and issues PSW confirmation documents (i.e., confirms the acceptance of the company's product size, appearance, materials, performance, production tools, processes, engineering data, etc., and approves mass production) 4.1.5 开始量产阶段: 取得 PSW 文件后, 公司进入量产阶段 4.1.5 Start of mass production stage: After obtaining PSW documents, the company enters the mass production stage 4.2 模具的核算流程 Accounting process for tooling 4.2.1 财务部收到预算管理部提交的经过批准的项目预算后, 就对该项目所预算的模具建立台账, 再对实际业务发生时超出预算的费用及时反馈给总经理。 4.2.1 After receiving the approved project budget submitted by the budget management department, the finance department establishes a ledger for the tooling budgeted for the project, and promptly provides feedback to the general manager on any expenses that exceed the budget when actual business occurs. 4.2.2 公司与客户签订该项目涉及的模具合同后, 市场部在签订协议后一周内把合同交给财务部备案。 4.2.2 After the company signs the tooling contract related to the project with the customers, the marketing department shall submit the contract to the finance department for filing within one week after signing the agreement. 4.2.3 财务部根据批准后的项目预算, 将实际发生的经营性模具和混合性模具成本归集在存货科目下的项目成本 (可设模具、材料、费用等子科目); 将实际发生的投资性模具成本归集在在建工程科目。 4.2.3 The finance department shall, based on the approved project budget, aggregates the actual costs of operational and mixed tooling under the project cost in the inventory account (sub-accounts			

	编号: NBHX-GZZD-FIC-005-02	版 本 号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总 页数	7/4

such as molds, materials, and expenses can be set up); aggregates the actual costs of investment tooling under the construction in progress account.

5、模具的会计处理 Accounting treatment of Tooling

5.1 经营性模具的会计处理 Accounting treatment of operation tooling

5.1.1 收入确认 Recognition of tooling revenue

当该项目模具属于 3.1 所规定的经营性模具的情况，由于模具单独定价，并直接销售给客户，属于单项履约义务，应在履行了合同中的履约义务，即在客户取得相关商品控制权时确认收入。

For operation tooling defined in section 3.1, since the tooling is priced separately and directly sold to the customers, it constitutes a single performance obligation. Revenue should be recognized when the performance obligation in the contract is fulfilled, that is, when the customers obtain control of the related goods.

实务操作中，按模具是否达到验收状态作为收入确认时点（获取 PSW 确认文件或者其他验收文件）。

In practical operations, the timing of revenue recognition is determined by whether the tooling has reached the acceptance state (obtaining a PSW confirmation document or other acceptance documents).

达到验收状态时，无论是否已开票（或部分开票），都应确认收入和成本，会计处理如下：

When the tooling reaches the acceptance state, regardless of whether it has been invoiced (or partially invoiced), revenue and cost should be recognized. The accounting treatment is as follows:

借：应收账款 Debit: Accounts receivable

贷：主营业务收入 Credit: Main business income

若模具尚未达到验收状态，模具款项已收到，计入合同负债科目。

If the tooling has not yet reached the acceptance state, but the tooling payment has been received, it should be recorded under the contract liability account.

对于 3.1.2 所定义的分期收款方式的经营性模具，若回款期限超过 1 年，应在长期应收款进行核算（而非应收账款），并识别重大融资成分，确认未实现融资收益。在融资成分不重大的情况下，可简化处理。

For operation tooling defined in section 3.1.2 with installment payment methods, if the repayment period exceeds one year, it should be accounted for under long-term receivables (rather than accounts receivable) and a significant financing component should be identified to recognize unrealized

	编号: NBHX-GZZD-FIC-005-02	版本号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总页数	8/4

financing income. In cases where the financing component is not significant, simplified treatment may be applied.

5.1.2 成本结转 Recognition of tooling cost

达到验收状态并确认模具收入，同时结转模具成本：

When the tooling reaches the acceptance state and the revenue is recognized, the tooling cost is transferred:

借：主营业务成本 Debit: Main business cost

贷：存货 Credit: Inventory

5.1.3 特殊情况处理 Exceptional case

项目达到 SOP 状态后，由于客户原因未能履行验收程序的，也应不晚于 SOP 状态 12 个月确认收入结转成本。

After the project reaches the SOP status, if the customers fail to complete the acceptance procedure due to their reasons, revenue and cost should be recognized no later than 12 months after the SOP status.

由于设计变更等原因导致模具成本超出初始合同价格的，若有依据确定客户承担设计变更增加的成本（合同约定、取得客户联络书、邮件沟通等），则按照实际发生的模具成本金额零毛利确认模具收入结转模具成本，后期取得客户补偿协议后，按照补偿金额确认模具收入；若无法确定客户是否承担设计变更增加的成本，则按照合同（提名信、对账单、邮件等）约定的价格金额零毛利确认模具收入结转模具成本，剩余未结转成本转至长期待摊费用进行摊销，后期取得客户补偿协议后，按照补偿金额确认模具收入，并结转摊余模具成本。各子公司涉及不同合同约定类型，处理方式与上述规定不一致的，子公司经上报股份公司批准后执行。

If the tooling cost exceeds the initial contract price due to design changes or other reasons, and there is evidence to determine that the customers will bear the additional cost of the design change (contractual agreement, obtaining a customer contact letter, email communication, etc.), then the tooling revenue and cost should be recognized at the actual tooling cost amount with zero profit. Later, when a customer compensation agreement is obtained, the tooling revenue should be recognized according to the compensation amount. If it is not possible to determine whether the customers will bear the additional cost of the design change, then the tooling revenue and cost should be recognized at the agreed price in the contract (nomination letter, account statement, email, etc.) with zero profit. The

	编号: NBHX-GZZD-FIC-005-02	版 本 号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总 页数	9/4

remaining un-transferred cost should be transferred to long-term deferred expenses for amortization. Later, when a customer compensation agreement is obtained, the tooling revenue should be recognized according to the compensation amount, and the remaining tooling cost should be transferred. For different contract types involving various subsidiaries, if the handling method is inconsistent with the above regulations, the subsidiary should execute it after obtaining approval from the headquarter.

5.1.4 现金流量 Cash flow

购建模具所支付的成本计入购买商品、接受劳务支付的现金；收到模具收入计入销售商品、提供劳务收到的现金。

The cash outflow paid for the purchase and construction of tooling is recorded as cash paid for the purchase of goods and acceptance of services; the cash inflow received of tooling is recorded as cash received from the sale of goods and provision of services.

5.2 投资性模具的会计处理 Accounting treatment of investing tooling

5.2.1 收入确认 Recognition of tooling revenue

当该项目模具属于 3.2 所规定的投资性模具，模具不单独定价，模具费包含或加成在零部件产品售价中，模具销售不定义为单项履约义务，因此不单独确认模具收入。

For the investment tooling defined in section 3.2, the tooling is not priced separately, and the tooling cost is included or added to the price of the products. The sale of the tooling is not defined as a single performance obligation, and therefore, tooling revenue is not recognized separately.

5.2.2 摊销 Amortization of tooling costs

投资性模具发生的成本归集在在建工程科目，达到 SOP 状态时，转至长期待摊费用科目，当月开始进行摊销。

The actual cost of investment tooling is aggregated under the construction in progress account. When the tooling reaches the SOP status, the project cost will be carried forward to the long-term deferred expenses account and amortized starting from the month of carrying forward.

摊销方式根据合同约定的客户承担方式区分按工作量法或按年限法分摊，对于客户不承担模具款的情况，按照生命周期进行摊销。

	编号: NBHX-GZZD-FIC-005-02	版 本 号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总 页数	10/4

The amortization methods are distinguished based on the customers ' burden methods as agreed in the contract, which are the workload method and the straight-line method. For cases where the customers do not bear the tooling cost, amortization is carried out over the life cycle.

两种分摊方式具体如下:

The two amortization methods are as follows:

5.2.2.1 按工作量法 the workload method

当期摊销的成本金额=项目模具成本/合同中约定的销售量*本期销售量

Amortized cost amount for the current period=project tooling cost/contracted sales volume * current sales volume

年底根据公司预测销售量调整摊销金额:

At the end of the year, adjust the amortization amount based on the company's forecasted sales volume:

当期摊销的成本金额=项目模具成本/公司预测销售量*累计销售量-已摊销的成本

Amortized cost amount for the current period=project tooling cost/ forecasted sales volume * accumulated sales volume- accumulated amortized cost amount for the early stage

5.2.2.2 按年限法 the straight-line method

当期摊销的成本金额=项目模具成本/合同中约定的分摊年限*本年度实际发生的时间

Amortized cost amount for the current period=project tooling cost/agreed allocation period in the contract * actual occurrence time of the current year

合同约定的分摊年限超过 5 年的, 按 5 年计算 (客户承诺补偿的情况除外)。年底评估未来受益年限, 及时调整剩余摊销年限。

If the amortization period agreed in the contract exceeds five years, it should be calculated as five years (except in cases where the customers have committed to compensation). At the end of the year, assess the future benefit period and adjust the remaining amortization period in a timely manner.

5.2.2.3 各子公司涉及细分行业, 或产品性能的不同, 分摊方式与上述规定不一致的, 子公司经上报股份公司批准后执行。

5.2.2.3 If each subsidiary is involved in a segmented industry or has different product performance, and the amortization method is inconsistent with the above regulations, the subsidiary shall implement it

	编号: NBHX-GZZD-FIC-005-02	版 本 号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总 页数	11/4

after reporting to the headquarter for approval.

5.2.3 现金流量 Cash flow

购建模具所支付的成本计入购建固定资产、无形资产和其他长期资产支付的现金。

The cash outflow paid for the purchase and construction of molds is recorded as cash paid for the acquisition and construction of fixed assets, intangible assets, and other long-term assets.

5.3 混合性模具的会计处理 Accounting treatment of mixed tooling

5.3.1 收入确认 Recognition of tooling revenue

当该项目模具属于 3.3 所规定的混合性模具的情况，客户按照约定比例一次性承担模具成本，剩余部分的模具款在后续产品单价中体现。基于行业惯例，模具所有权归属于客户，该模具销售可以认定为单项履约义务。该合同收入属于固定收入加可变对价的形式。模具验收后，按照约定收款比例确认模具收入。

For mixed tooling defined in section 3.3, the customers bear a portion of the tooling cost in a lump sum according to the agreement, and the remaining tooling cost is reflected in the subsequent product unit price. Based on industry practice, the ownership of the tooling belongs to the customers, and the sale of tooling can be recognized as a single performance obligation. The contract revenue is in the form of fixed income plus variable consideration. After the tooling is accepted, the revenue should be recognized according to the agreed payment ratio.

会计处理与经营性模具相同。

The accounting treatment is the same with operation tooling.

5.3.2 成本结转及摊销 Recognition and amortization of tooling cost

达到验收状态确认模具收入，同时按相同比例结转模具成本。剩余项目成本从存货转入长期待摊费用进行摊销，摊销方式与投资性模具一致。

When the tooling reaches the acceptance state, the tooling revenue is recognized, and the tooling cost should be transferred at the same proportion. The remaining project cost is transferred from inventory to long-term deferred expenses for amortization, using the same method as for investment tooling.

5.3.3 现金流量 Cash flow

现金流量与经营性模具一致。

	编号: NBHX-GZZD-FIC-005-02	版 本 号	A
	模具、检具、工装核算摊销回收作业指导书	修改次第	03
		页次/总 页数	12/4

The treatment of cash flow is the same with operation tooling.

6、模具的减值测试 Impairment testing of tooling

公司至少在每年 12 月中旬, 由财务部召集相关部门, 对账上所有的项目模具进行评估:

At least in mid of December of each year, the finance department shall convene relevant departments to evaluate all project tooling on the reconciliation:

6.1 对于期末列示在长期待摊费用的模具, 如 5.2.2 所述, 及时调整公司预测销售量或剩余摊销年限。

6.1 For tooling reported as long-term deferred expenses at the end of the period, as described in section 5.2.2, adjust the company's forecasted sales volume or remaining amortization period in a timely manner.

6.2 对于期末在存货列报的模具, 若模具成本低于可变现净值 (预计售价减去进一步加工成本和预计销售费用以及相关税费后的净值), 则表明存在减值迹象: 公司结合项目整体情况进行评估, 由公司相关权限人员批准后进行减值计提, 并进行相应的账务处理。

6.2 For tooling reported as inventory at the end of the period, if the tooling cost is lower than the net realizable value (the estimated selling price minus further processing costs, estimated selling expenses, and related taxes), it indicates the signs of impairment. The company should assess the overall project situation and, after approval by the relevant authorized personnel, perform impairment provisions and carry out the corresponding accounting treatment.

7、本作业指导书由财务部制订并解释。

This instruction guide is formulated and explained by the finance department.

8、本作业指导书自批准之日起生效, 同时原作业指导书废止。

This instruction shall take effect from the date of approval, and the original work instruction shall be invalidated.
